

Data Science Job & Salary Analysis Report

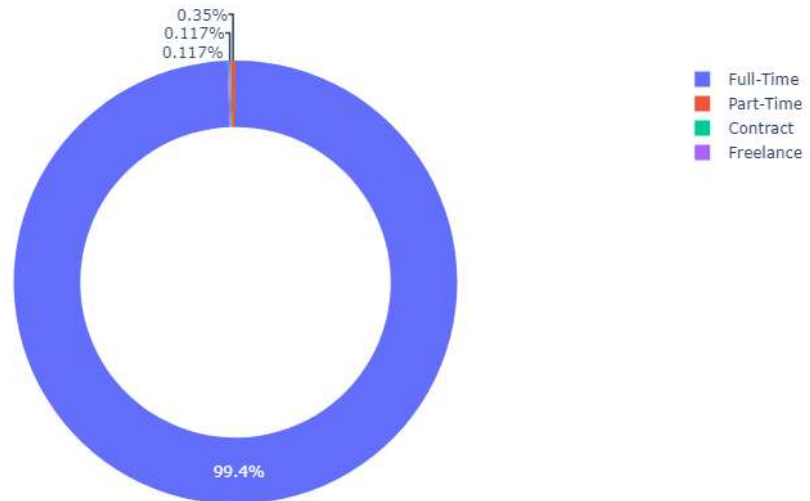

1. Introduction: The general objective of this project is to see what kind of salaries are paid for any job title in the data science job sector. What kind of people do large, small, and medium-sized companies in different countries employ?

2. Data Cleaning and Preprocessing: During data cleaning and processing, I usually remove any minor job titles and leave only the major job titles.

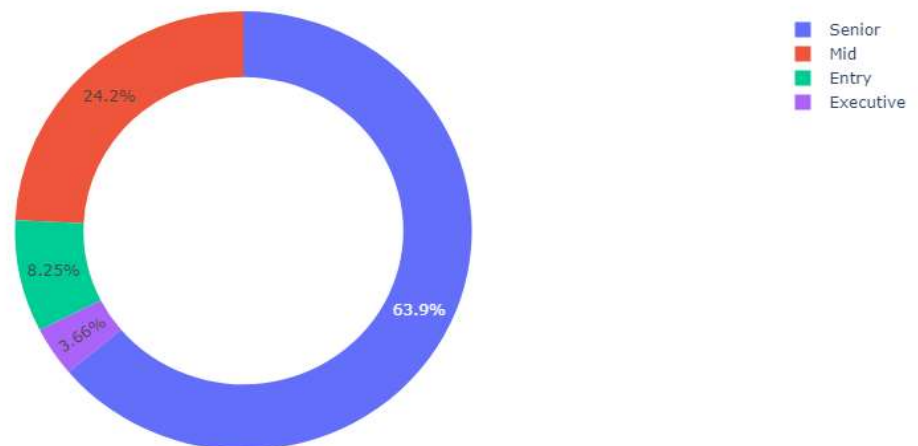

3. Data Visualization:

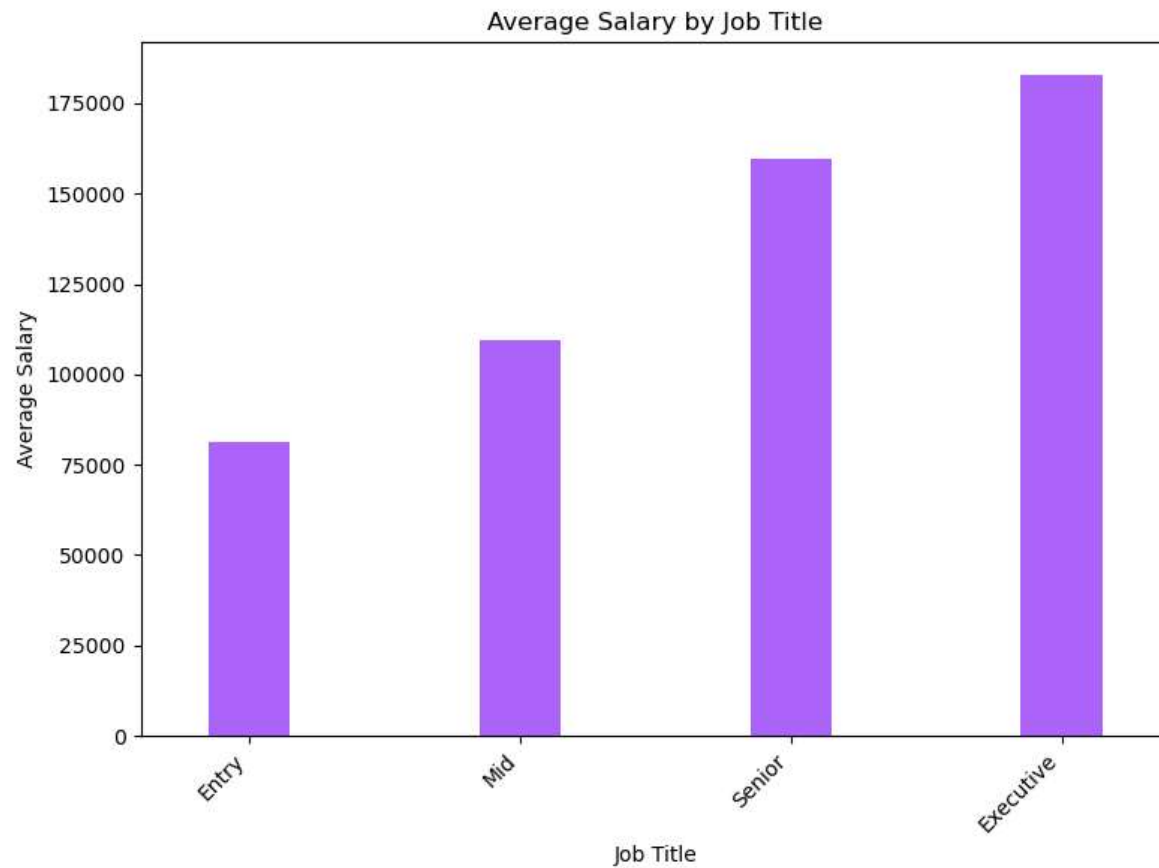

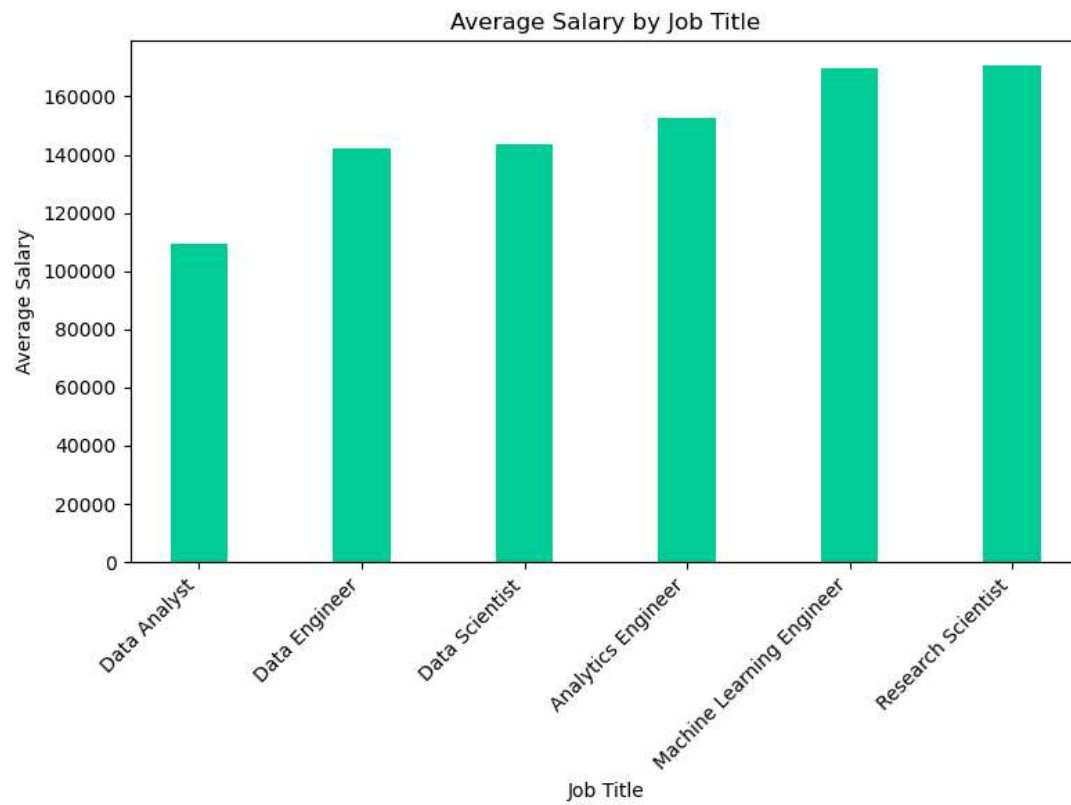

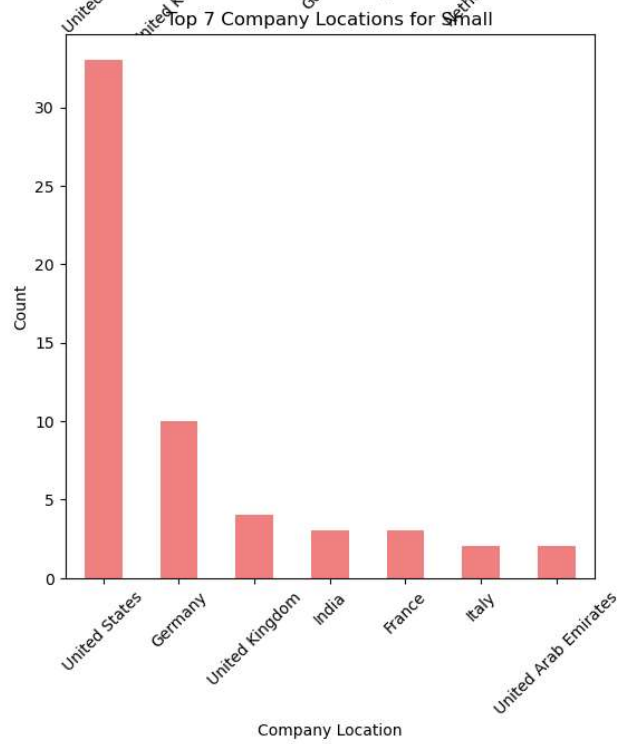

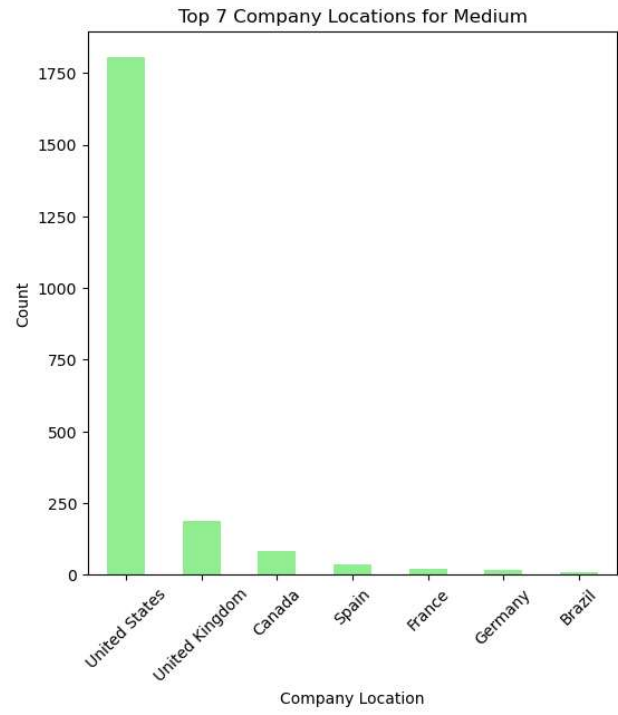

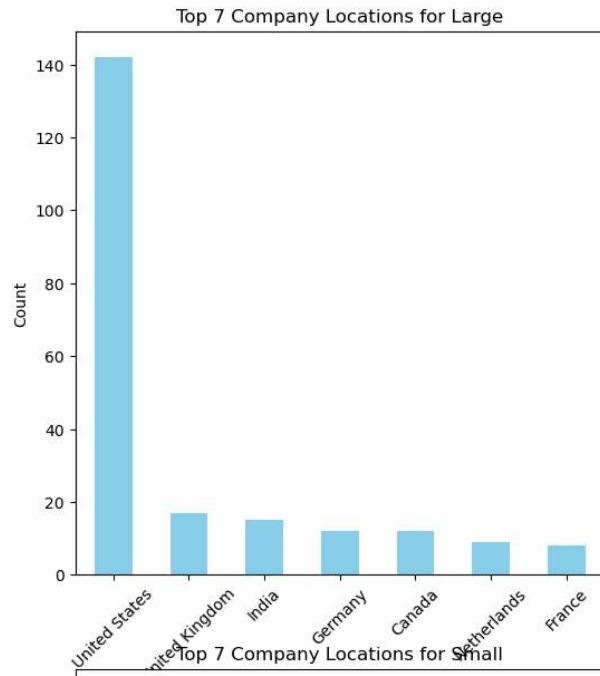

***What type of work does an employee do in the data science sector?**

What percentage of the workforce is employed in the data science industry at different levels?

***Our most important findings are job title, employee type, experience level and average salary.**
